IOLAR

Iolar Operational Services manages the new Chinchilla Waste and Recycling Centre to forge the path towards sustainable waste management practices for the Western Downs Region.

"The Towards a Waste Wise Western Downs strategy will see Council deliver on its commitment to build much-needed new infrastructure and improve existing ageing waste infrastructure across the region through the development of The Chinchilla Waste and Recycling Centre' states Mayor Ray Brown.

According to Mayor Brown "The new waste management facility follows in the successful footsteps of the Dalby Waste and Recycling Centre and offers residents in the Chinchilla district an environmentally sustainable alternative for managing their waste," he said.

"By providing increased recycling and reuse opportunities, the new Chinchilla Waste and Recycling Centre will help divert recyclable items away from landfill and assist in developing more sustainable waste management practices.

The waste management organisation responsible for this contract, is local leader and waste management innovator, Iolar. Headed by Patrick Navin, the Iolar Operational Services division is excited about the opportunity to work with Western Downs Regional Council and the Local Chinchilla Community helping them to recover more resources from their waste stream. Patrick and his team 'aim to recover as many resources as possible while providing high levels of customer service throughout the entire process'.

With over 20 years' experience in environmental and waste management industries. Patrick has worked in government and private sectors in Australia and Europe and built an enviable reputation for his skills, knowledge and high level of customer service.

Iolar is a specialist waste management and resource recovery company delivering operational and consultancy solutions for both private and local government sectors.

Patrick and his teams have successfully managed major landfills, recycling and resource recovery facilities are highly committed to achieving practical, sustainable and innovative waste management and resource recovery solutions.
